

`System.out.print("👁");`

`System.out.print("Kartik");`

1st
arg → `System.out.print("Hello");`
`System.out.print("geekster's");`
2nd
arg = `System.out.print("Hello geekster's");`

→ `[Hello👁geekster's]`
→ `[Hello
geekster's]`

↳ Hellogeekster's
↳ `System.out.print("Hello geekster's");`

↓
println

→ `System.out.println("Hello");`
`System.out.println("geekster's");`

next line

`//` → `/* */` → commented line
multiple lines

```
1 import java.io.*;
2 import java.util.*;
3
4 public class Solution {
5     public static void main(String[] args) {
6         System.out.print("Hello World. I am here.");
7     }
8 }
```

→ main method
// write our code.
